

COVID-19 Special Instructions

Hello,

If you are about to begin a course, these are the current regulations in compliance with government prescribed Covid-19 social distancing and preventive measures.

The risks currently associated with Covid-19 require us to take specific measures to guarantee the health and peace of mind of everyone. Even if these measures seem excessive to you, we all react differently under the circumstances and it is important that everyone feels safe. After all, as an establishment open to the public, we have the responsibility to follow the authorities' statutory recommendations.

Thank you for your understanding and cooperation.

Best regards,
Center Management

In practice:

TEST *highly* recommended :

In order to take as much precaution as possible, we also recommend that you perform a test (which will not be checked) within 24 hours before arrival at the Centre, this to ensure that you are indeed not infected with Covid.

Wearing a mask is not compulsory anymore, but is still recommended for vulnerable people.

Health and Safety Protocol & Contact Cases:

The Centre has a strict health protocol, including control of the health pass, use of hydro-alcoholic gel, ventilation of enclosed spaces, etc.

We are awaiting an update of the ministerial websites in order to define the next safety protocol and (contact cases management) if still necessary.

We would like to inform you of the residual risks and the procedures in place to manage positive cases and contact cases.

If Covid is suspected, the person will have to leave the course.

If they test positive, then all of that person's contacts will have to be tested and possibly leave the course.

In the context of the Centre, a person will be a contact case:

- if he/she sleeps in the same room or dormitory as the person tested positive
- if he/she eats in the same room as the person tested positive

For information, all students and servants eat indoors again because of the cold weather.

Meals are taken in two dining rooms for men and two dining rooms for women, in two shifts, in order to minimise the number of people together in one room without masks.

NB. It is possible to avoid the risk of being a contact case by eating all your meals outside.

For those who have not been vaccinated: if you come by train or shuttle, we strongly encourage you to have someone ready to pick you up if you test positive during the course. You will have to leave the centre, will be able to take the TER (regional train) but not the TGV.
